

## Product Description

WDS NextraShell is a mechanically robust 3D microporous insulation formed into curved segments and shells and it is available in a wide range of diameters and thicknesses.

The engineered mineral matrix which constitutes the insulation core has been specifically designed for applications where good mechanical resistance, associated with the lowest thermal conductivity, are key selecting criteria.

Like any other microporous insulation of our industrial range produced with our exclusive WDS Technology process, it features extremely good handling properties, extremely low thermal conductivity coefficient giving it very good insulating properties in limited thickness allowing to design equipment where high energy efficiency, space optimization and reduction of weight are other premium factors to be considered.

## Environmental & Health Safety

WDS NextraShell does not contain any hazardous or decomposition substance according to the EU Directive 2006/1907/EEC and IARC. The fibers or filaments used as reinforcement of the mineral core are also exonerated from any classification as define by the WHO (World Health Organization).

## Resistance to Moisture and Water

WDS NextraShell has a non-porous surface therefore it is sensitive to all liquids that can wet it; this includes substances such as water, oil and petroleum spirit, since they can destroy the pore structure. Non condensed moisture does not affect the product.

Sensitivity to liquids of WDS NextraShell can be eliminated by using a surface treatment such as temperature resistant aluminum foil or shrink-wrapping with PE Film.

## Features

- Best-in-class for low thermal conductivity in the widest temperature spectrum
- Not affected by thermal shock
- Mechanically strong
- Improved product mineral matrix core features minimal dust release and very good handling and machining abilities
- Good resistance to compression associated to its low density
- Homogeneity throughout the entire surface and thickness of the board leading to consistency in performances per square area of material installed
- Highly efficient insulation in limited space and weight constraints
- Inorganic and non-combustible
- Unaffected by most chemicals
- Structural integrity

## Benefits

- Dimensionally stable over time up to the maximum using temperature
- Freedom in engineering at the design stage
- Easy to cut and with proven installation techniques
- Low weight lining system can be foreseen due to the extremely favorable product density /thickness ratio
- Environmentally friendly
- Helps to control energy efficiency and heat flow very precisely
- Increases effective volume inner capacity or reduces encumbrance in equipment and apparels of any kind.

## Specific Application Advantages

- Ultra-thin insulation allowing to save space and weight on pipe racks
- Less quantity of metal cladding required improving significantly operational costs and ROI
- Tightest tolerances guarantee perfect fit for fast installation and efficiency pipe sealing
- Less pipe congestion on rack allow easier accessibility for faster maintenance and intervention
- Very good pedestrian resistance once installed
- Wide option of thicknesses and diameters available
- Water resistant encapsulation available
- Does not deteriorate and maintain its physical and performances over time
- Perfect combination with our water repellent Superwool<sup>®</sup> blankets to address corrosion under insulation at best

Whilst the values and application information in this datasheet are typical, they are given for guidance only. The values and the information given are subject to normal manufacturing variation and may be subject to change without notice. Morgan Advanced Materials – Thermal Ceramics makes no guarantees and gives no warranties about the suitability of a product and you should seek advice to confirm the product's suitability for use with Morgan Advanced Materials - Thermal Ceramics.

## Physical, Thermal and Chemical Properties

	Test Method	WDS NextraShell
Classification Temperature, °C (°F)		1000 (1832)
Density, kg/m <sup>3</sup> (pcf), nominal		275 (17.7)
Cold Compressive Strength, MPa (psi)	ASTM C 165	0.30 (43.5)
Linear Shrinkage, %, ASTM C365		
Full soak, 1000°C (1832°F), 24 hours	ASTM C365	<3.0
One side exposed soak, 800°C (1472°F), 12 hours		0.3
<b>Thermal Conductivity, W/m•K (BTU•in/hr•ft<sup>2</sup>•°F)</b>		
200°C (392°F)	ASTM C 177	0.022 (0.152)
400°C (752°F)		0.023 (0.159)
600°C (1112°F)		0.027 (0.187)
800°C (1472°F)		0.033 (0.228)
<b>Chemical Analysis, % weight basis after firing</b>		
Silica, SiO <sub>2</sub>		55-75
Silicon Carbide, SiC		25-40
Others		3-10
Loss of Ignition, Dry condition		<2.5

## Shelf life

- WDS NextraShell has unlimited shelf life if it stored properly
- WDS NextraShell must be handled and stored in dry conditions
- WDS NextraShell is resistant to diffusion by atmospheric humidity (water vapor) proving condensation is avoided

## Standard Dimensions and Availability

DN	Length, mm (in)	Thickness, mm (in)
DN15, DN20, DN25, DN32, DN40, DN50, DN65, DN80, DN100, DN125, DN200	500 (19.68), 1000 (39.37)	20, 25, 30, 35, 40, 45, 50 (0.8, 1, 1.2, 1.4, 1.6, 1.8, 2)
Other diameters and thicknesses are available on demand
