

## SAFETY DATA SHEET

Following Regulation 1910.1200

SDS Number: RP351      Date of first issue: 19 February 2021      Date of last revision: 21 February 2022

### 1 - Identification of product

#### a - Product identifier used on the label

Tradenames: SW HT Wet Felt

#### b - Other means of identification

#### c - Recommended use of the chemical and restrictions on use

Application as thermal insulation, heat shields, heat containment, gaskets and expansion joints in industrial furnaces, ovens, kilns, boilers and other process equipment and in the aerospace, automotive and appliance industries, and as passive fire protection systems and firestops. (Please refer to specific technical data sheets for more information)

#### d - Name, address, and telephone number

Morgan Advanced Materials  
P. O. Box 923; Dept. 300  
Augusta, GA 30903-0923  
Telephone: 706-796-4200

#### e - Emergency Phone Number

For Product Stewardship and Emergency Information:

Hotline - 1-800-722-5681

Fax - 706-560-4054

For additional SDSs and to confirm this is the most current SDS for the product, visit our web page [www.morganthermalceramics.com](http://www.morganthermalceramics.com) or send a request to [MT.NorthAmerica@morganplc.com](mailto:MT.NorthAmerica@morganplc.com)

### 2 - Hazard Identification

#### a - Classification of the chemical in accordance with paragraph (d) of §1910.1200

#### b - Signal word, hazard statement(s), symbol(s) and precautionary statement(s) in accordance with paragraph (f) of §1910.1200

Not classifiable according to OSHA HCS 2012 (29CFR1910.1200).

#### Emergency Overview

#### c - Describe any hazards not otherwise classified that have been identified during the classification process

Mild mechanical irritation to skin, eyes and upper respiratory system may result from exposure.

These effects are usually temporary.

#### d - Mixture Rule

### 3 - Composition / Information On Ingredients

#### a - Composition table

COMPONENTS	CAS NUMBER	% BY WEIGHT
Alkaline-Earth Silicate Wool <sup>(1)</sup>	436083-99-7	Up to 95
Silica Amorphous	7631-86-9	Up to 65
Water*	7732-18-5	0-55

<sup>(1)</sup> **CAS definition:** Alkaline Earth Silicate (AES) consisting of silica (50-82 wt %), calcia and magnesia (18-43 wt %), alumina, titania and zirconia (less than 6 wt %), and trace oxides. This CAS composition also covers Morgan Thermal Ceramics products Calcium-Magnesium-Silicate Wool (CAS no. 329211-92-9) and Calcium-Magnesium Zirconium-Silicate Wool (CAS no. 308084-09-5).

\* Applies to **Wet Felt** and products with "-W" designation only.

#### b - Common Name

(See Section 8 "Exposure Controls / Personal Protection" for exposure guidelines)

#### d - Impurities and Stabilizing Additives

#### 4 - First-Aid measures

##### a - Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion

###### Eyes

If eyes become irritated, flush immediately with large amounts of lukewarm water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Do not rub eyes.

###### Skin

If skin becomes irritated, remove soiled clothing. Do not rub or scratch exposed skin. Wash area of contact thoroughly with soap and water. Using a skin cream or lotion after washing may be helpful.

###### Respiratory Tract

If respiratory tract irritation develops, move the person to a dust free location. See Section 8 for additional measures to reduce or eliminate exposure.

###### Gastrointestinal

Unlikely route of exposure.

##### c - Indication of immediate medical attention and special treatment needed, if necessary

If symptoms persist, seek medical advice.

#### 5 - Fire-fighting measures

##### a - Suitable (and unsuitable) extinguishing media and

Use extinguishing media suitable for type of surrounding fire

##### c - Special Protective Equipment and Precautions for Firefighters

NFPA Codes: Flammability: 0 Health: 1 Reactivity: 0 Special: 0

##### b - Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products):

Non-combustible products, class of reaction to fire is zero. Packaging and surrounding materials may be combustible.

#### 6 - Accidental Release Measures

##### a - Personal precautions, protective equipment, and emergency procedures

No specific environmental precautions required. Do not allow material to contaminate ground water system.

##### b - Methods and materials for containment and cleaning up

Pick up large pieces and dispose in a closed container. Follow precaution stated in above section for clean up.

#### 7 - Handling and storage

##### a - Precautions for safe handling

Limit the use of power tools unless in conjunction with local exhaust. Use hand tools whenever possible. Frequently clean the work area with HEPA filtered vacuum or wet sweeping to minimize the accumulation of debris. Do not use compressed air for clean-up.

##### b - Conditions for safe storage, including any incompatibilities

Store in original factory container in a dry area. Keep container closed when not in use. Do not reuse the container.

##### c - empty containers

Product packaging may contain residue. Do not reuse.

#### 8 - Risk Management Measures / Exposures Controls / Personal Protection

##### a - OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available

##### b - Appropriate Engineering Controls

Use engineering controls such as local exhaust ventilation, point of generation dust collection, down draft work stations, emission controlling tool designs and materials handling equipment designed to minimize airborne fiber emissions.

##### c - Individual protection measures, such as personal protective equipment

###### PPE - Skin

Wear personal protective equipment (e.g gloves), as necessary to prevent skin irritation. Washable or disposable clothing may be used. If possible, do not take unwashed clothing home. If soiled work clothing must be taken home, employees should be informed on best practices to minimize non-work dust exposure (e.g., vacuum clothes before leaving the work area, wash work clothing separately, and rinse washer before washing other household clothes.

###### PPE - Eye

As necessary, wear goggles or safety glasses with side shields.

###### PPE – Respiratory

When engineering and/or administrative controls are insufficient to maintain workplace concentrations below the appropriate REG/PEL/REL, the use of appropriate respiratory protection, pursuant to the requirements of OSHA Standards 29 CFR 1910.134 and 29 CFR 1926.103, is recommended. A NIOSH certified respirator with a filter efficiency of at least 95% should be used. The 95% filter efficiency recommendation is based on NIOSH respirator selection logic sequence for exposure to particulates. Selection of filter efficiency (i.e. 95%, 99% or 99.97%) depends on how much filter leakage can be accepted and the concentration of airborne contaminants. Other factors to consider are the NIOSH filter series N, R or P. (N) Not resistant to oil, (R) Resistant to oil and (P) oil Proof. These recommendations are not designed to limit informed choices, provided that respiratory protection decisions comply with 29 CFR 1910.134. The evaluation of workplace hazards and the identification of appropriate respiratory protection is best performed, on a case by case basis, by a qualified industrial hygienist.

You may also refer to health and safety information on the HTIW Coalition website [www.HTIWCoalition.org](http://www.HTIWCoalition.org)

## 9 - Physical and chemical properties

<b>a - Appearance</b>	White, odorless, fibrous material
<b>b - Odor</b>	No odor
<b>c - Odor Threshold</b>	Not applicable
<b>e - pH</b>	Not applicable
<b>d - Melting Point</b>	1275 - 1300°C (2327 - 2372°F)
<b>f - Initial Boiling Point/Range</b>	Not applicable
<b>g - Flashpoint</b>	Not applicable
<b>h - Evaporation Rate</b>	Not applicable
<b>i - Flammability</b>	Not applicable
<b>j - Upper/Lower Flammability or Explosive Limits</b>	Not applicable
<b>k - VAPOR PRESSURE</b>	Not applicable
<b>l - VAPOR DENSITY</b>	Not applicable
<b>m - Solubility</b>	Less than 1 mg/litre
<b>n - Relative Density</b>	2.5 - 3.0
<b>o - Partition Coefficient: n-Octanol/water</b>	Not available
<b>p - Auto-ignition temperature</b>	Not applicable
<b>q - Decomposition Temperature</b>	Not applicable
<b>r - Viscosity</b>	Not applicable

## 10 - Stability and Reactivity

### a - Reactivity

### b - Chemical Stability

This is a stable material.

### c - Possibility of Hazardous Reaction

Not applicable.

### d - Conditions to Avoid

Please refer to handling and storage advise in Section 7.

### e - Incompatible Materials

None

### f - Hazardous decomposition products

None

## 11 - Toxicological information

### a - TOXICOKINETICS, METABOLISM AND DISTRIBUTION

### b - Acute Toxicity

#### IRRITANT PROPERTIES

Superwool fibers are negative when tested using approved methods (Directive 67/548/EEC, Annex 5, Method B4). Like all man-made mineral fibers and some natural fibers, fibers contained in this product can produce a mild mechanical irritation resulting in temporary itching or rarely, in some sensitive individuals, in a slight temporary reddening. Unlike other irritant reactions, this is not the result of allergy or chemical skin damage but is caused by mechanical effects.

### c - Epidemiology

This material has not been the subject of an epidemiology study.

#### AES Wools

Neither the International Agency for Research on Cancer (IARC) nor the National Toxicology Program nor any other U.S. regulatory or classification entity has evaluated AES wool. Superwool products are members of a family of materials whose properties are distinct in several ways from other man-made mineral fibers. In October 2001 IARC re-reviewed Man-Made Vitreous Fibers and "elected not to make an overall evaluation of the newly developed fibers" [such as AES wool] but recognized that "those that have been tested appear to have low carcinogenic potential in experimental animals."

While AES wool is an inert material that does not react with the skin, exposures may cause temporary mild mechanical irritation to the eyes, skin, nose and/or throat (for First Aid Measurers, see Section 4). Proper handling practices and the use of protective clothing (see Section 8) can minimize irritation.

### d - Toxicology

#### AES Wool:

Fibers contained in the products listed in the title have been designed to be rapidly cleared from lung tissue. This low biopersistence has been confirmed in many studies on AES using EU protocol ECB/TM/27(rev 7). When inhaled, even at very high doses, they do not accumulate to any level capable of producing a serious adverse biological effect. In lifetime chronic studies there was no exposure-related effect more than would be seen with any "inert" dust. Subchronic studies at the highest doses achievable produced at worst a transient mild inflammatory response. Fibers with the same ability to persist in tissue do not produce tumors when injected into the peritoneal cavity of rats.

#### Silica, Amorphous:

Toxic effects found in animals following a single inhalation exposure to amorphous silica include upper respiratory irritation, lung congestion, bronchitis and emphysema. Repeated inhalation exposures at concentrations of 50 to 150 mg/m<sup>3</sup> produced increased lung weights and lung changes. No progressive pulmonary fibrosis was seen and the observed lung changes were reversible. No adverse effects were observed in this study at 10 mg/m<sup>3</sup>. No animal test reports have been found which define carcinogenic, mutagenic or reproductive effects.

#### International Agency for Research on Cancer and National Toxicology Program

## 12 - Ecological information

These products are not reported to have any ecotoxicity effects.

### c - Bioaccumulative potential

No bioaccumulative potential.

### d - Mobility in soil

No mobility in soil.

### e - Other adverse effects (such as hazardous to the ozone layer)

No adverse effects of this material on the environment are anticipated.

### 13 - Disposal Considerations

#### Waste Management and Disposal

Waste from this product is not hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Incinerate in approved facility. Do not incinerate closed container. Dispose of in accordance with Federal, State/Provincial, and Local regulations regarding pollution.

#### Additional information

This product, as manufactured, is not classified as a listed or characteristic hazardous waste according to U. S. Federal regulations (40 CFR 261). Any processing, use, alteration or chemical additions to the product, as purchased, may alter the disposal requirements. Under U. S. Federal regulations, it is the waste generator's responsibility to properly characterize a waste material, to determine if it is a "hazardous" waste. Check local, regional, state or provincial regulations to identify all applicable disposal requirements.

### 14 - Transport information

#### a - UN number.

Hazard Class: Not Regulated United Nations (UN) Number: Not Applicable  
Labels: Not Applicable North America (NA) Number: Not Applicable  
Placards: Not Applicable Bill of Lading: Product Name

#### b - UN proper shipping name

Not applicable.

#### c - Transport hazard class(es)

This material is not regulated hazardous material for transportation.

#### d - Packing group, if applicable

Not applicable.

#### e - Environmental hazards (e.g., Marine pollutant (Yes/No))

No.

#### f - Transport in bulk (according to Annex II of MARPOL 73/78 and the IBC Code)

Not regulated.

#### g - Special precautions which a user needs to be aware of, or needs to comply with, in connection with transport or conveyance either within or outside their premises

Not applicable.

#### International

INTERNATIONAL

Canadian TDG Hazard Class & PIN: Not regulated

Not classified as dangerous goods under ADR (road), RID (train), IATA (air) or IMDG (ship).

### 15 - Regulatory information

#### 15.1 - United States Regulations

##### **UNITED STATES REGULATIONS**

**SARA Title III:** This product does not contain any substances reportable under Sections 302, 304, 313 (40 CFR 372). Sections 311 and 312 apply.

**OSHA:** Comply with Hazard Communication Standards 29 CFR 1910.1200 and 29 CFR 1926.59 and Respiratory Protection Standards 29 CFR 1910.134 and 29 CFR 1926.103.

**TSCA:** AES wools have been assigned several CAS numbers; however, as "article", they are not required to be listed on the TSCA inventory.

**CERCLA:** AES wool contains fibers with an average diameter greater than one micron and thus is not considered a CERCLA hazardous substance.

**CAA:** AES wool contains fibers with an average diameter greater than one micron and thus is not considered a hazardous air pollutant.

**States:** AES wools are not known to be regulated by any State. If in doubt, contact your local regulatory agency.

#### 15.2 - International Regulations

**Canada WHMIS:** No Canadian Workplace Hazardous Materials Information System categories apply to this product.

**Canadian EPA:** All substances in this product are listed, as required, on the Domestic Substance List (DSL).

**European Union:** These products are exonerated from any carcinogenic classification in the countries of the European Union under the provisions of Nota Q of the European Commission Directive 97/69/EC.

## 16 - Other Information

### initial statement

#### Devitrification

##### PRECAUTIONARY MEASURES TO BE TAKEN AFTER SERVICE UPON REMOVAL

High temperature insulating wool (HTIW) is typically used in insulation applications to keep temperature exposure at 900°C or above in a closed space. The exposure temperature maximum occurs at the hot face surface of the insulation. The heat exposure on the insulation decreases from the hot face to the cold face as the insulation "insulates itself". As a result, only thin layers of the hot face surface of the insulation become devitrified and respirable dust generated during removal operations typically do not contain detectable levels of crystalline silica (CS).

Toxicological evaluation of the effect of the presence of CS in artificially heated HTIW material has not shown any increased toxicity in vitro and in vivo. The results from different factor combinations such as increased brittleness of fibers or micro crystals embedded in the glass structure of the fiber and therefore not biologically available, may explain the lack of toxicological effects. IARC evaluation as provided in Monograph 68 is not relevant since CS is not biologically available in after-service HTIW.

#### Product Stewardship Program

High concentrations of fibers and other dusts may be generated when after-service products are mechanically disturbed during removal. Therefore, ECFIA and HTIW Coalition recommend:

- a) Controlled measures are taken to reduce dust emissions and
- b) All personnel directly involved wear an appropriate respirator to minimize and comply with local regulatory limits.

For more information, call the Morgan Thermal Ceramics Product Stewardship Hotline (800-722-5681).

#### HMIS HAZARD RATING

HMIS Health: 1

HMIS Flammable: 0

HMIS Reactivity: 0

HMIS Personal Protective: To be determined by user

#### TECHNICAL DATA SHEETS

Left Blank Intentionally (pending datasheet number)

#### Revision Summary

1<sup>st</sup> Edition of SDS

#### MSDS prepared by

SDS Prepared By: MORGAN THERMAL CERAMICS ENVIRONMENTAL, HEALTH & SAFETY DEPARTMENT

#### Disclaimer

The information presented herein is presented in good faith and believed to be accurate as of the effective date of this Safety Data Sheet. Employers may use this SDS to supplement other information gathered by them in their efforts to assure the health and safety of their employees and the proper use of the product. This summary of the relevant data reflects professional judgment; employers should note that information perceived to be less relevant has not been included in this SDS. Therefore, given the summary nature of this document, Morgan Thermal Ceramics does not extend any warranty (expressed or implied), assume any responsibility, or make any representation regarding the completeness of this information or its suitability for the purposes envisioned by the user.
